Re: Water shut-off  
Well chlorination

The Santa Barbara County Health Services has tested the water in our well and discovered that it is unsatisfactory. Therefore, we will begin chlorinating the well tonight, April 24, at 7:30 p.m. The well pump will be turned off at 7:30 and the chlorine will be allowed to remain in the well and storage tanks overnight without pumping. The pump will be turned back on by 7:00 a.m. Thursday morning.

Please prepare for this water shut-off by taking showers and washing dishes and clothes before 7:30 p.m. tonight. When the water comes back on it will be suitable for washing, but do not drink the water until the chlorine smell has gone away.

If you have any questions, please contact me at 683-0464.

Enclosed for your information is a list of all current well members.

Also enclosed is a form to be filled out by you regarding the type of water system you have at your house. The county is requiring us to provide one of these forms for each household on our well. Please fill this form out immediately and return it to me by Monday, April 29. If you have any questions about this form, please contact me.
