

To all Romaldo Water Users (Members):

4/2/91

As a result of the well breaking down on the weekend of February 16, and a new pump and pump line being installed: an assessment of \$30.00 per billing period per household was implemented. This is to last for approximately one year or until the repairs are paid for.

This last week it was determined that the pressure tank pump is in need of replacing. The cost will be approximately \$1,158.00 for a new 15 HP pump and motor. The old pump and motor will be rebuilt and kept as a back up. The monthly assessment will be extended until all of the repairs are paid for.
