

5 November 1992

Dean May
5655 West Camino Cielo
Santa Barbara, CA 93105

Dear Dean May:

Re: Jarrin Water Company Well

HANCY Well #2
APN 153-120-015

Enclosed is the monitoring data for your well(s) and/or spring(s). This data was collected as part of the Goleta Water District's (GWD) Bedrock Monitoring Program. Thank you for participating in this program. In addition, this letter is to notify you that 3 reports have recently been completed for the GWD. These reports are:

- Biological Monitoring of Riparian and Wetland Habitats in the Santa Ynez Mountains North of Goleta Valley for the Schulte Well Project, prepared for the Goleta Water District, prepared by Science Applications International Inc., 30 September 1992
- Final Report, Results and Analyses, Schulte Well Project Monitoring Program, Santa Ynez Mountains North of Goleta, Goleta Water District, prepared by Chris Conway, 15 October 1992.
- Final Report, Bedrock Monitoring Program, Santa Ynez Mountains North of Goleta, Hydrographs and Monitoring Data, 1983 to 1992, Goleta Water District, prepared by Chris Conway, 3 November 1992.

These reports present the final results of hydrologic and biologic monitoring in the Santa Ynez Mountains above Goleta between 1983 to 1992. Analyses of the monitoring data collected for your well(s) and/or spring(s) is presented in at least one of these reports.

These monitoring programs document the effects of the recent drought and analyze the potential additional effects of ground-water extraction by wells. In addition, databases have been developed to help understand the complexity and safe yield of the bedrock system. The GWD General Manager currently intends to discontinue these monitoring programs. If you would like to review any of the reports listed above, or have any concerns about the discontinuation of the Bedrock Monitoring Program, please send your comments in writing to Robert A. Paul, General Manager/Chief Engineer and the Board of Directors, Goleta Water District, 4699 Hollister Avenue, Goleta, CA 93111.
